REPORT

TO

The Right Honourable George J. Shaw Lefevre, M.P., President of the Local Government Board, &c. &c.

(1892.)

Sir,

I have the honour to submit to you the following report on the marriages, births, and deaths registered in England and Wales during the year 1892.

Population.

The population of England and Wales, as enumerated on the 6th April 1891, consisted of 29,002,525 persons. The natural increase, or excess of births over deaths, from the beginning of April 1891 to the middle of 1892 amounted to 392,720. This would bring the population at the latter date up to 29,395,245, supposing there to have been no migration. Emigration and immigration, however, cannot be disregarded in estimating a population. In the absence of precise information on these points the estimated populations published in the Annual Reports are based on the assumption that the rate of increase which prevailed in the last intercensal period has since been maintained—a method which, as has been shown (*see* pp. v–vi of 53rd Annual Report), is not likely to lead to serious error when so large an area as that of the entire country is dealt with.

Thus estimated, the population in the middle of the year 1892 was 29,405,054, and consisted of 14,247,943 males and 15,157,111 females (Table 1). It is on this population that the rates in the present report have been calculated.

Marriages.

The number of marriages registered in the year was 227,135, and corresponded to a rate of 7·7 marriages, or 15·4 persons married, per 1000 living. The rate in 1886 was only 14·2, but from that date it rose continuously, first to 14·4 in the years 1887 and 1888, then to 15·0 in 1889, and to 15·5 in 1890, until in 1891 it reached 15·6; since which year it has fallen, as above stated, to 15·4 in 1892. The mean rate in the three years, 1890–1–2, is higher than the mean in any other three consecutive years since 1876–7–8. If, therefore, the marriage-rate is an index of prosperity, the condition of the country has, on the whole, been improving in recent years. The counties with the lowest marriage-rates in 1892 were Rutlandshire 11·5, Middlesex 11·7, Hertfordshire 11·9, Herefordshire 12·6, and Surrey, the North Riding of Yorkshire, and Westmorland each 12·8. The counties with the highest marriage-rates were Staffordshire, the West Riding of Yorkshire, and Northumberland 16·1, Warwickshire 16·3, Lancashire 16·4, the East Riding of Yorkshire 16·5, Nottinghamshire 16·7, South Wales 16·9, and London 17·4.

The slight fall of the marriage-rate in 1892 coincided with a further considerable fall in the value of British exports, and in the amount cleared at the Bankers' Clearing House, per head of population, and also with a fall in the price of wheat, which brought it within sixpence per quarter of the price

in 1889, which was the lowest on record, as is shown in the following table:

TABLE A.—MARRIAGE-RATE, BRITISH EXPORTS and IMPORTS, PRICE of WHEAT, and amount cleared at the London Bankers' Clearing House, 1860–92.*

1892	15·4	5 19 2	11 2 5	18 15 6	30 3	220

* The figures in the marriage-rate column are not strictly comparable with those in the value columns, inasmuch as the former relate only to England and Wales, whilst the latter relate to the whole of the United Kingdom. The figures relating to exports and imports and to the price of wheat are derived from the Board of Trade Statistical Abstracts; and those showing the amount cleared at the London Bankers' Clearing House (calculated upon the population of England and Wales) are derived from the same source.

Forms of Marriage.—Of the 227,135 marriages contracted in 1892, 158,632, or 698 per 1000, were celebrated according to the rites of the Established Church, and 68,503, or 302 per 1000, otherwise. In 1891 the proportions had been 699 and 301, or practically the same as in 1892 (Table 5). The proportion of marriages amongst Roman Catholics fell from 42 to 40 in the 1,000, while that amongst other non-conforming bodies remained stationary at 118. The Jewish marriages, of which the proportion had been gradually rising for a long series of years, and had reached 4·6 per 1000 in 1891, were again 4·6 per 1,000 in 1892. This supports the opinion expressed in the last Annual Report that the proportion of Jews in the population of this country has more than doubled in the last 20 years.

First marriages; Re-marriages.—Of 1000 men married during the year 1892, 884 were bachelors, and 116 were widowers; while of 1000 women who married, 918 were spinsters and 82 were widows. This is the first notable break in the decline of re-marriages as compared with first marriages which has been going on since 1876. The number of persons married in 1892 who were described in the register as having been previously divorced, and who, in the above proportions, are included among the bachelors and spinsters, was 190, including 108 men and 82 women. This total exceeded that recorded in any of the seven preceding years, in which the numbers had been respectively 170, 163, 173, 178, 150, 181, and 184. Of the 108 divorced men, 93 married spinsters, 9 married widows, and 6 married divorced women. Of the 82 divorced women, 52 married bachelors, 24 married widowers, and 6 married divorced men.

Ages at Marriage.—In regard to 6239, or 2·7 per cent., of the marriages, the age of one or other of the contracting parties was omitted from the register. Of the remaining 220,896 couples, whose ages were stated, the mean ages were 28·46 for the men and 26·19 for the women. The mean age of the bachelors was 26·48, of the widowers 44·51, of the spinsters 24·98, and of the widows 40·54. In each of these groups, the mean age was the highest on record. This shows, as the returns of recent previous years have also shown, that there is an increasing tendency to defer marriage until a somewhat later period of life. Evidence to the like effect is afforded by the decline in the proportion of under-age marriages. In the earlier years of civil registration the proportions of those who married under 21 years of age were less than 50 in the thousand for men, and less than 150 in the thousand for women; but the proportions went on increasing steadily until in 1874 they stood at 84 in the thousand for men, and 227 in the thousand for women; these being the maximum record for each sex respectively (Table 7). The under-age marriages then began steadily to decline, and they have continued to do so almost uninterruptedly till 1892, when the figures stood at 59 for men and at 187 for women, or almost the same as in 1858.

The counties in which the proportions of under-age marriages among men in 1892 were highest were Bedfordshire, Staffordshire, Leicestershire, and Nottinghamshire; and that this is not the casual occurrence of a single year is shown by the fact that these four counties were among the five with the highest average proportions both in 1891 and in the whole decennium 1881–90. The counties with the highest proportions of under-age marriages among women were Durham, Nottinghamshire, Derbyshire, Staffordshire, Monmouthshire, Yorkshire, Buckinghamshire, and Leicestershire. With the one exception of Buckinghamshire these counties had also stood highest in the list in 1891 as well as in the previous decennium.

Almost similar agreement exists between the figures for 1892 and those for recent previous years, in the counties with the lowest proportions; there being very low proportions in both periods for men in Herefordshire, Shropshire, and North Wales; and for women in Devonshire, Here-

fordshire, Shropshire, Westmorland, and North Wales. It is plain, therefore, that the comparative frequency of early marriages in different counties is not merely a temporary phenomenon, but is one depending on persistent causes.

Signature in Marriage Register.—The men who signed the marriage register with marks instead of writing their names were in the proportion of 56 in 1000, while the similarly illiterate women were 66 in 1000. In 19 out of 1000 marriages both bridegroom and bride used that form of signature. With the progress of elementary education there has been a continuous diminution in the proportions of both men and women signing with marks; and in 1892 the proportions, as compared with those in 1891, showed a reduction of 13 per cent. for men and of 10 per cent. for women.

Buildings registered for the Solemnisation of Marriages.—At the end of the year 1892 there were 15,092 churches or chapels belonging to the Established Church in which marriages could be solemnised, showing an increase of 48 upon the number at the end of the previous year. There were also 10,998 buildings registered for marriage by rites other than those of the Established Church, showing an increase of 217, or 2·0 per cent., upon the number on the register at the end of 1891. (Table 9.)

Certified Places of Worship.—During the year 1892, 559 new buildings were certified for religious worship under the provisions of the Acts 15 & 16 Vict. c. 36, and 18 & 19 Vict. c. 81, while 115 buildings already certified were removed from the register by cancellation; the number of buildings so certified on the register at the end of the year was 27,767. It is probable, however, that some of these are no longer used, although they have not yet been removed from the register by cancellation.

Births.

The births registered in the year numbered 897,957, and were in the proportion of 30·5 to each 1000 persons living, this rate being lower than in any previous year on record, with the one exception of 1890, when the rate did not exceed 30·2. Compared with the mean rate of births in the decennium 1882–91, which had been 32·2, the rate in 1892 showed a deficiency of 1·7 per 1000.

The recent rise in the marriage-rate has, in spite of the anticipated* effect of the influenza epidemic, kept the birth-rate a little above the low point reached in 1890; and it may be predicted that, when the corrected figures for 1893 are available, a further recovery of the birth-rate will be found to have taken place.

The registration counties with highest birth-rates were again as usual the mining and industrial counties; one reason for this being that the proportion of young married persons of reproductive ages is higher in such counties than in the country at large; thus, the highest rates were 32·2 in Lancashire, 32·4 in Nottinghamshire, 33·0 in Derbyshire, 33·2 in Northumberland, 34·4 in South Wales, 35·3 in Staffordshire, 35·7 in Monmouthshire, and 36·6 in Durham. On the other hand the lowest rates, in no case exceeding 26·0, were in Surrey, Sussex, Dorsetshire, Devonshire, Herefordshire, Rutlandshire, and Westmorland. (Table 10.)

Sex.—The male births numbered 456,622, and the female births 441,335, the former being to the latter in the proportion of 1035 to 1000, the average proportion in the previous decennium having been 1037 to 1000.

The proportions of male to 1000 female births were highest in the following counties:—Rutlandshire 1161, Cambridgeshire 1095, Huntingdonshire 1090, Sussex 1075, Cheshire 1067, and Bedfordshire 1066. They were

* *See* Registrar General's 54th Annual Report, p. ix.

lowest, in Westmorland 921, in Herefordshire 957, in Oxfordshire 1001, in Wiltshire 1009, in Warwickshire and in the East Riding of Yorkshire 1011, and in Kent and in Leicestershire 1012.

Illegitimate Births.—The infants registered as born out of wedlock numbered 37,581: they were in the proportion of 42 to 1000 births, and of 1·3 to 1000 persons living, these proportions being the same as in 1891, and therefore the lowest as yet recorded (Table 2). The registration counties which showed the highest proportions per 1000 of illegitimate to total births were Cumberland 72, Shropshire 70, Norfolk 66, North Wales 64, Herefordshire 62, Westmorland 61, and Lincolnshire and Nottinghamshire 56. The counties in which the lowest proportions obtained were Essex and Monmouthshire 29, Middlesex 30, South Wales 33, Warwickshire 34, and Northamptonshire and Somersetshire 35.

Deaths.

During the year 1892 the deaths registered in England and Wales numbered 559,684, and were in the proportion of 19·0 to 1000 persons living. This rate was lower by 1·2 per 1000 than the exceptionally high rate of 1891, and was also 0·3 per 1000 lower than the average rate in the entire decennium 1882–91.

The lowest county rates, in no case exceeding 17·0 per 1000 were, in Rutlandshire 12·8, in Surrey, in Middlesex, and in Westmorland 16·0, in Lincolnshire 16·5, in Kent and in Northamptonshire 16·8, in Cumberland and in Sussex 17·0; whilst the highest were, in South Wales 19·9, in Staffordshire 20·2, in London 20·3, and in Lancashire 21·3. (Table 10.)

Sex.—The 559,684 deaths included 286,062 of males and 273,622 of females. The death-rate of males was 20·0, and that of females 18·0, per 1000 living of the corresponding sex. (Table 10.)

Out of equal numbers living there were 1111 deaths of males to 1000 deaths of females, the difference being less than in any year since 1866; the average proportion in the decennium 1882–91 had been 1123 to 1000.

Ages.—With a few exceptions the death-rates at the several ages had reached their lowest levels in 1888, and had remained nearly constant in 1889. (Tables 11 and 12.) In 1890 there had been an increase at every age-group, attributable mainly to influenza. In 1891 this increase had been practically maintained at ages under 35; while at ages over 35 there had been a further increase. In 1892 the changes were somewhat remarkable. At all age-groups under 35 the rates fell again to about the same levels as in 1889; in the groups between 35 and 65 for males, and between 35 and 55 for females, the rates fell to figures intermediate between those of 1889 and 1890; whilst in the groups above 65 for males, and above 55 for females, the rates fell to about the same levels as in 1890 (a trifling exception in the case of females being the age-group 75–85, in which the fall was not quite so great).

Infantile Mortality.—The infantile death-rate or proportion of deaths of infants under one year to registered births was 148 in a thousand, a proportion which had been slightly exceeded in 1886, in 1890, and in 1891, but otherwise was higher than in any year of the preceding decennium. (Table 18.)

Urban and Rural Mortality.—The decrease of mortality in 1892, as compared with 1891, was more conspicuous in the urban than in the rural population, the death-rate among the former being only 108 to 100 among the latter. The lowest previous proportion had been 113 to 100 in 1885 and again in 1886, whilst the proportion in 1890 had been as high as 120 to 100.

The urban rate had been suddenly raised by the influenza epidemic from 19·3 in 1889 to 20·9 in 1890, and had been 21·1, or practically the same, in 1891. The rural rate, on the contrary, had been raised by two nearly equal steps from 16·4 in 1889 to its maximum, 18·5, in 1891. In 1892 the urban rate fell to 19·5, barely exceeding the rate in 1889, while the rural rate fell only to 18·1, which is nearer to the rate in 1891 than to that in 1890. The influenza epidemic would appear to have commenced in the towns, where it practically exhausted itself in 1890 and 1891, and to have spread more slowly in the country districts, where it took longer to die out. This impression is strengthened by examination of the rates in the separate quarters: thus there was a sudden and remarkable rise of mortality in the first quarter of 1890, which affected the urban districts more than the rural, the rate in the former being 3·8 per 1000 higher than the rate in the first quarter of the previous year, whereas the excess in the latter was only 3·2 per 1000. A second rise in mortality began in the last quarter of 1890, was perceptible in the first quarter of 1891, and became serious in the second quarter of that year. Consideration of the death-rates in successive quarters suggests that this rise either began earlier, or was more severe at its commencement, in the urban than in the rural districts. The third great rise in mortality was in the first quarter of 1892, and this time the rural districts showed an enormous excess, their death-rate for the first time on record exceeding the rate in the urban districts. (Table 25.)

Registered Causes of Death.

The deaths, when distributed to the several classes by their assigned causes, gave the rates shown in the following table:—

Table B.—Mortality from the several Classes of Diseases.

Causes of Death.	Total Deaths 1892.	Rate per Million living.											
		1892.	1891.	1890.	1889.	1888.	1887.	1886.	1885.	1884.	1883.	1882.	Mean 1882–91.

Zymotic or Specific Febrile Diseases.—In the year 1892 the deaths ascribed to this class of disease numbered 82,099, and were in the proportion of 2785 to a million persons living; this proportion showing a further increase on that of the year immediately preceding, which had exceeded the proportion in any other year since 1884. In 1892 there was a decrease in the death-rates from influenza, enteric fever, and whooping-cough; but this decrease was more than counterbalanced by the increased mortality from measles, scarlet fever, diphtheria, and diarrhœal diseases.

After three years of practical immunity from *small-pox*, the deaths in 1892 suddenly rose to 431, and were equal to a rate of 15 per million of the population. Of these deaths 13 per cent. were returned as vaccinated, and 25 per cent. as unvaccinated, while in 62 per cent. no statement as regards vaccination was made. It is much to be regretted that medical men continue to neglect, in so large a proportion of such cases, to give this very desirable item of information. In addition to the above, 123 deaths were attributed to chicken-pox (some of which were, perhaps, mistaken cases of the graver disease) and 58 deaths were referred to effects of vaccination. The total number of deaths either certainly or possibly caused by small-pox, and of deaths alleged to have been caused by the means taken to prevent small-pox during the year 1892, was 612.

The deaths from *measles* in the year 1892 numbered 13,553, and were equal to a rate of 460 per million of the population, which corresponds almost exactly with the mean rate (456 per million) in the previous ten years.

In the 54th Annual Report an interesting comparison was made between certain counties as regards the distribution of measles mortality in a succession of years. Continuing that comparison we find that the disease, which in 1891 had spread through Lancashire, Staffordshire, and the West Riding of Yorkshire, decreased in these counties in 1892; whilst a considerable increase occurred in the neighbouring counties of Warwickshire, Leicestershire, and Derbyshire, in the East and North Ridings of Yorkshire, and also in Westmorland and Durham. The epidemic which had prevailed in Somersetshire, Wiltshire, and Gloucestershire in 1891, disappeared in 1892 from the first two of these counties, but still persisted in Gloucestershire. The increase in Warwickshire noted above was possibly in part due to infection from Gloucestershire. There was an increase of the disease in Dorsetshire (which had suffered severely in 1888, but had been absolutely free from fatal cases in 1890, and had suffered a rate of only 79 per million in 1891); this epidemic does not, however, appear to have extended further eastwards. The measles epidemic which had been exceptionally severe in Cornwall in the course of 1890 and 1891 ceased almost entirely before the beginning of 1892.

The experience of recent years goes to show that, speaking generally, high minimum rates of measles mortality are associated with large unbroken populous areas: the occurrence of high maxima in the same areas points either to gross carelessness or to bad sanitary condition, probably to both. On the other hand, low minimum rates of mortality from measles are apparently associated with populations broken up into detached groups; since the infection may under such circumstances fail to be conveyed from one group to another; in which case the disease may die out for a season.

Scarlet fever.—The deaths from scarlet fever numbered 5618, and were equal to a rate of 190 per million living. This rate was higher than that in 1891, which had been 171 per million, but with this exception was lower than the rate in any previous year on record.

The year 1892 was the eighth successive year in which the deaths from scarlet fever have been under 8000, the average number in the eight years having been 6353, and the average rate 225 per million. The lowest previous rate was 402 per million in the year 1884.

In 1892 not less than 69 per cent. of the London deaths from scarlet fever occurred in Hospitals or in Workhouse Infirmaries, as compared with 60 per cent. in 1891. The type of scarlet fever, as observed at the Metropolitan Asylum Hospitals in 1892 was even milder than it had been in the preceding five years. The mortality amounted to 6·41 per cent. of the cases treated, as compared with 8·56 per cent. in the years 1887–91.

It is noteworthy that the counties which are subject to the highest mortality from measles for the most part show also a like susceptibility with regard to scarlet fever. Thus we find that in 1882–91 the following nine counties showed the highest average rates from measles: London, Staffordshire, Cheshire, Lancashire, the West Riding of Yorkshire, Durham, Cumberland, Monmouthshire, and South Wales. If we omit from this list London, Cheshire, and Cumberland, and add to it Nottinghamshire, Derbyshire, and Northumberland, we have the nine counties with the highest average scarlet fever mortality. The counties of London and Cumberland are remarkable exceptions, for the measles death-rate in London during the ten years was 612 per million, whilst the scarlet fever rate did not exceed 291; in Cumberland the measles rate was 481, against 185 for scarlet fever.

As in the case of measles, the mortality from scarlet fever is ordinarily much greater in the northern than in the southern part of the country. If a line be drawn along the southern boundaries of Lincolnshire, Nottinghamshire, Derbyshire, Staffordshire, and Cheshire, the measles rate in 1882–91 averaged less than 400 per million in every county south of this line, except London, Warwickshire, Monmouthshire, and South Wales; and the scarlet fever rate was below 300 per million in every county south of the same line except Leicestershire, Monmouthshire, and South Wales. To the north of the line the measles rates were above 400 in all the counties except Lincolnshire, Nottinghamshire, Derbyshire, the East and North Ridings of Yorkshire, and Westmorland, and very nearly 400 in two of these counties; and the scarlet fever rates were above 300 in all except Lincolnshire, Cheshire, Cumberland, and Westmorland. The most noticeable exceptions (Monmouthshire and South Wales to the south of the line with high rates, and Lincolnshire to the north with low ones), justify the statement that both these diseases show a peculiar tendency to spread amongst mining populations.

A comparison of the county rates in 1892 with those in 1891 shows generally increased scarlet fever mortality in the southern parts of the country, but as the mortality from this disease in these parts was generally very low in 1891, the increase still leaves all the counties except London, Somersetshire, and Gloucestershire with rates below the rate for the whole of England and Wales. In 1892 by far the highest county rates were (as in the previous year also) those of Monmouthshire and South Wales. The rate in North Wales was also excessive in 1892 in consequence of outbreaks in Wrexham, Holywell, and Carnarvon. The only other counties with rates exceeding those of the whole country were Leicestershire, Lancashire, and the West Riding of Yorkshire.

Enteric Fever.—The deaths from enteric (typhoid) fever during the year 1892 numbered 4037, and corresponded to a rate of 137 per million of the population, the rate in 1891 having been 168. The interval between the year 1869, when enteric fever was first separately classified, and the year 1891 may be usefully divided into three periods as regards differences in the mortality from that disease; the maximum rate in the second period having been lower than the minimum in the first, and the maximum rate in the third period, lower than the minimum in the second.

Table C.—Mortality from Enteric Fever in England and Wales, 1869–91.

——	Mean Rate per Million.	Highest Rate per Million.	Lowest Rate per Million.
10 years 1869–1878 - -	354	390	279
6 „ 1879–1884 - -	233	261	212
7 „ 1885–1891 - -	177	185	168

It might at first sight appear probable that the drop from 168 per million in 1891 to 137 in 1892, was the beginning of a fourth period of still lower enteric fever mortality. Such an assumption, however, would be unjustifiable, for the provisional numbers of deaths from "fever" (including typhus, enteric, and ill-defined fevers), furnished by the several registrars for the Registrar-General's Quarterly returns, show a large increase in 1893, bringing the probable mortality from enteric fever in that year very nearly up to the mean level of the second of the above-mentioned periods (1879–84). At present, therefore, we can safely deal only with the fact that the mortality from enteric fever was much lower in 1892 than in any previous year.

As in previous years, the highest county death-rates from enteric fever were in the northern parts of England and Wales, although all these rates were lower in 1892 than they had been in 1891. The five highest rates were in Nottinghamshire, Cheshire, Lancashire, the East Riding of Yorkshire, and Durham, and these counties, with the addition of the North Riding of Yorkshire and Northumberland, had shown the seven highest rates in 1891. In the North Riding the rate fell from 516 in 1890 and 344 in 1891, to 156 in 1892. The rate in Northumberland fell from 218 in 1890, and 240 in 1891, to 118 in 1892.

In addition to the five counties named above as showing the highest enteric fever rates in 1892, seven counties had rates exceeding the rate in the whole country, viz:—Norfolk, Devonshire, Staffordshire, Derbyshire, the West and North Ridings of Yorkshire, and South Wales. In all of these twelve counties, however, except Norfolk, Devonshire, and Derbyshire, the rates in 1892 were lower than those of the previous year.

In several counties, notably in Hampshire, Berkshire, Middlesex, Hertfordshire, Bedfordshire, Norfolk, Wiltshire, Devonshire, Cornwall, Somersetshire, Herefordshire, and Derbyshire, the rates in 1892 exceeded those in 1891; but, as will be seen by comparison with the preceding list, only three of these increased rates were as high as the average rate for the whole country. Careful examination of the figures in the Table on pp. 160–192 shows the increased rates to have been due to outbreaks, in some cases very severe in character, but generally affecting small areas only.

In the last two reports of the Registrar-General, attention was drawn to a group of 18 registration districts, extending from Morpeth to Middlesbrough and Guisborough, in which there had been excessive enteric fever mortality for some years. The mortality from enteric fever during the three years 1890–1–2, in these districts taken as a group, was as follows:—

TABLE D.—MORTALITY from ENTERIC FEVER in a GROUP of 18 REGISTRATION DISTRICTS, 1890–1–2.

Year.	Deaths.	Rates per Million.
1890 - - -	601	394
1891 - - -	465	300
1892 - - -	285	180

In the year 1892 the rate in this group of districts was still in excess of the rate for the whole country, but it only slightly exceeded the average in the period 1885–1891 (see Table C). Taking the districts separately, the decline has been general, Morpeth and the contiguous districts of Sunderland and Easington being the only instances of notable excess in the year 1892.

The deaths from *diphtheria* in the year 1892 numbered 6552, and were in the proportion of 222 per million. This is the first time since the year 1864 that the diphtheria rate has reached 200 per million. Part of the

increase of the diphtheria death-rate in recent years is, doubtless, due to transference from "croup," to which cause 2235 deaths were referred in the year 1892. Taking diphtheria and croup together, the rate in 1892 was equal to 298 per million, and exceeded that in the previous year by 34 per million; it was, however, exactly equal to the mean rate in the four years 1887–90, and was below the mean in the 27 years 1865–91, which had been 311.

There can be no doubt that diphtheria was more fatal in 1892 than in either of the preceding two years, and the provisional figures obtained from the registrars point to a still more serious rise in 1893.

There were several changes in the local incidence of diphtheria in 1892. Of the sixteen counties which had shown the highest rates in 1891, only nine (London, Surrey, Sussex, Middlesex, Hertfordshire, Buckinghamshire, Essex, Suffolk, and Gloucestershire) were among the sixteen with the highest rates in 1892. But of these nine, not fewer than eight are in the south-eastern continuous area of high diphtheritic rates referred to in the 47th Report. In the year 1892 this area was diminished by the removal of Norfolk, but was extended by the addition of Kent, Berkshire, Oxfordshire, Huntingdonshire, and Bedfordshire. The south-eastern diphtheritic region appears, therefore, persistently to deserve that title. Its boundaries change slightly from year to year, but it always includes London and some of the neighbouring counties. What has been described as the western diphtheritic region appears to be less constant. In 1892 it was represented by the continuous, but not very compact, area of Monmouthshire, Gloucestershire, Worcestershire, and Shropshire, in all of which counties, however, the diphtheria rates in 1892 were below the average for England and Wales. In the northern part of the country the diphtheria rates were generally low, only one county (Durham) having a rate approaching that of England and Wales.

The deaths from *whooping-cough* numbered 13,406 and were in the proportion of 455 to a million living, or nearly the same as with the rate from measles, which as already stated was 460 per million. In the decennium 1882–91 the mean death-rates from these two diseases had been exactly identical, namely, 456 per million; their local distributions, however, although following somewhat similar lines, present some remarkable differences. For example:—the fifteen registration counties which suffered most severely from measles in the ten years 1882–91, are, in the order of their death rates, Lancashire, Monmouthshire, London, Staffordshire, Durham, Cumberland, Cheshire, South Wales, the West Riding of Yorkshire, Warwickshire, Northumberland, Nottinghamshire, Gloucestershire, Middlesex, and Worcestershire. If we remove Cheshire, Gloucestershire, and Worcestershire from this list, and add to it Essex, Cornwall, and Cambridgeshire, we have the fifteen counties which suffered the highest average death-rates from whooping-cough. While, however, in the case of measles, Lancashire, Monmouthshire, and London head the list with average rates of 734, 644, and 612 per million respectively, in the case of whooping-cough the three highest average rates were 709 in London, and 545 in Essex and also in Cornwall, Lancashire coming fourth, with a rate of 526. But in spite of these differences of detail, the general fact remains that, like measles, whooping-cough is most fatal in large centres of population and in mining districts.

Of the ten counties, viz., Staffordshire, Monmouthshire, Lancashire, London, Derbyshire, the East Riding of Yorkshire, Nottinghamshire, Essex, Cheshire, and South Wales, with the highest death-rates from whooping-cough in 1892, all except Lancashire and London had in the previous year shown rates below that for the whole country. Conversely, of the ten counties which had shown the highest rates in 1891, all except London and

Lancashire showed comparatively low rates in 1892. The outbreaks during 1892 in Staffordshire, Derbyshire, and Nottinghamshire appear to have extended from Worcestershire, Warwickshire, and Leicestershire, in all of which counties the rates had been high in 1891.

Influenza.—As had also been the case in the preceding two years, the year 1892 was marked by severe prevalence of influenza, accompanied by great increase in the mortality from certain other diseases, notably those of the respiratory organs. It is therefore advisable again to discuss the mortality from influenza in conjunction with that from diseases of the respiratory class; and we shall not be far wrong if we consider the excess of mortality from these combined causes as representing approximately the severity of the influenza epidemic. It will be convenient to use the year 1889 as a standard of comparison, both because it may be regarded as a year of approximately normal mortality, and because it immediately preceded the first outbreak of influenza.

It would be impossible within the limits of this report to trace the course of the epidemic in great detail, but by a division of the country into three sections we shall be enabled to present with greater clearness some of the more important facts. The three sections here referred to are (1) the first registration division, consisting of Registration London; (2) the second, third, fourth, and fifth registration divisions, comprising the remainder of the southern part of the country, and bounded by an irregular line drawn from the Wash to the Bristol Channel; (3) the remainder of the registration divisions, comprising the part of the country to the north of this boundary.

The first outbreak of influenza, which occurred early in the year 1890, was specially fatal in London and in several of the large towns in both the southern and northern parts of England and Wales; of the three above-defined sections of the country London suffered most, and the southern counties least, severely. The second and much more serious outbreak, in the second quarter of 1891, again attacked London and the large towns, the greatest excess of mortality in the three sections of the country being again in London, and the next greatest in the northern counties. The third outbreak, in the first quarter of 1892, affected London to about the same extent that the first outbreak had done, and the northern counties to a somewhat less extent; but it affected the southern counties, and particularly their rural parts, with great severity. A short Table will make this clear.

TABLE E.—MORTALITY per 1000 living, attributed to INFLUENZA and DISEASES of the RESPIRATORY ORGANS, in the 4 Years 1889–92.

—	Rates per 1000 in each Year.				Excess in 1890–1–2, the rates in 1889 being taken as Standard.			
	1889.	1890.	1891.	1892.	1890.	1891.	1892.	Mean of 3 Years.
London (Division I.) - -	3·68	5·06	5·85	5·06	1·38	2·17	1·38	1·64
Southern Counties (Divisions II.–V.)	2·44	3·17	3·69	4·16	0·73	1·25	1·72	1·23
Northern Counties (Divisions VI.–XI.)	3·84	4·82	5·68	4·52	0·98	1·84	0·68	1·17
England and Wales -	3·42	4·39	5·12	4·49	0·97	1·70	1·07	1·25

From Table E. it further appears that the maximum severity of the epidemic, as measured by the excess of mortality from these diseases, did not greatly differ in the three sections of the country, being represented by 2·17 per 1000 in London in 1891, by 1·84 in the northern counties in the same year, and by 1·72 in the southern counties in 1892. Taking together the three outbreaks of influenza the loss of life was relatively greatest in London; whilst it was rather greater in the southern than in the northern counties.

An estimate of the probable loss of life due to the influenza outbreaks in 1890 and 1891, based on the excess of mortality at ages above 35, in those years as compared with the decennial average, was made in the last Annual Report. The excess of mortality from influenza and diseases of the respiratory organs in the three years 1890–1–2, as computed in Table E., leads to an estimate on a somewhat higher scale; for the mean annual excess of mortality in England and Wales attributed to these causes in the three years was 1·25 per 1000 living, and this would represent nearly 110,000 deaths. Any such estimate must, of course, be largely conjectural, since we have no means of ascertaining what the mortality would have been from respiratory diseases or from other causes had there been no epidemic of influenza. Certain general considerations, however, lead to the conclusion that the above is by no means an excessive estimate. In the first place, the first outbreak occurred in a quarter which was exceptionally mild for the time of year, and therefore unlikely to be marked by special prevalence of respiratory diseases; and the second outbreak attained its greatest severity during a season when the mortality from respiratory diseases is usually low. In the second place, the mortality from the principal zymotic diseases, including diarrhœa (these being the chief causes, other than respiratory diseases, of annual fluctuations of mortality), was lower in 1890–1–2 than in 1889. And in the third place, many deaths which were in reality due to the epidemic were doubtlessly ascribed to diseases of the nervous, circulatory, and other organs, in addition to those referred to diseases of the organs of respiration. It may be regarded as probable that the actual mortality due to influenza in England and Wales in the three years 1890–1–2 was not less than 110,000, and it is at least possible that it considerably exceeded this number.

The deaths referred to *diarrhœal complaints* (diarrhœa, dysentery, and cholera), numbered 15,336, and were in the proportion of 520 per million of the population. With four exceptions, viz., in the years 1879, 1885, 1888, and 1891, the rate from diarrhœal diseases in 1892 was lower than any recorded in the previous 45 years.

Only 6 deaths were referred to *hydrophobia*, the numbers in the two preceding years having been 8 and 7 respectively. With the single exception of the year 1868, when the number was 7, these were by far the lowest figures recorded since 1863, the yearly average in the 28 years, 1864–91, having been 32.

To *puerperal fever* 2356 deaths were referred in the year 1892, and to the various accidents of childbirth 2838. These deaths, taken together, numbered 5194, and were equal to a mortality of 5·78 to 1000 registered births, which is a higher rate than that of any year since 1875.

Parasitic Diseases.—The deaths thus classified numbered 617, of which 479 were referred to thrush and 138 to other parasitic diseases. The mortality attributed to this class of disease was lower in 1892 than in any previous year on record.

Dietetic Diseases.—The deaths referred to the dietetic class of disease in 1892 numbered 2325, and corresponded to an annual rate of 79 per million

living, as compared with 67, the mean rate in the ten years 1882–91. (Table B.) Of these 2325 deaths the number directly ascribed to intemperance was 1971, being in the proportion of 67 per million living. The rates in 1890 and 1891 had been slightly higher than this, but with these two exceptions the rate in 1892 was higher than in any previous year on record. (Table 16.)

Constitutional Diseases.—The deaths referred in 1892 to this large and important class of disease numbered 93,420, and were equal to a rate of 3168 per million of the population. The deaths from cancer in 1892 numbered 20,353, and corresponded to an annual rate of 690 to a million living; this rate is slightly lower than that of 1891, but with this exception it is the highest rate on record. Diabetes caused 2011 deaths in the year 1892, the rate being equal to 68 per million, which is the highest recorded rate from this disease. The deaths from phthisis numbered 43,323, and corresponded to a rate of 1468 per million living, which is the lowest rate on record.

Developmental Diseases.—To this class 47,885 deaths, or 1624 per million of the population, were ascribed in 1892. The deaths referred to old age, simply, numbered 27,866, and corresponded to a rate of 944 per million living, as compared with 977 and 1011 respectively in the years 1890 and 1891. In the 54th Report attention was called to the constantly increasing frequency of deaths from premature birth, and also in a less degree from congenital defects, the mortality per 1000 births under both these headings having steadily increased for a great number of years, until in 1891 it stood at 18·00 from premature birth, and 3·60 from congenital defects. In the year 1892, these rates were exceeded, the figures reaching 18·46 from premature birth and 3·83 from congenital defects.

Local Diseases.—To this class 288,920 deaths or 51·6 per cent. of the deaths from all causes were assigned in the year 1892. These deaths corresponded to a rate of 9801 per million of the population, a rate decidedly lower than the exceptionally high rates of 1890 and 1891, and also slightly below the mean (9930 per million) of the rates in the ten years 1882–91. (Table B.) The deaths from diseases of the respiratory system (exclusive of croup) numbered 114,536, and were in the proportion of 3884 per million living. This proportion, whilst considerably lower than the excessive rates of the preceding two years, was nevertheless higher than the mean rate (3699) in the ten years 1882–91. Diseases of the nervous system, exclusive of convulsions, caused 47,809 deaths, corresponding to a rate of 1622 per million living. This is the lowest rate from nervous diseases since the year 1869. To diseases of the circulatory system 49,648 deaths, or 1684 per million living were referred. The deaths from these diseases in 1892 were proportionally fewer than in the preceding two years, but as compared with the mean of the ten years 1882–91, the 1892 rate still showed an excess of 62 per million. The deaths from diseases of the urinary system numbered 13,242 and corresponded to a rate of 449 per million, which is considerably lower than the rate of 1891, but slightly in excess of the mean (443) for the ten years 1882–91.

Violence.—The deaths referred during 1892 to accident or negligence numbered 16,343, and were equal to a rate of 553 per million of the population, which was somewhat lower than the average (558) in the previous decennium. The deaths ascribed to homicide numbered 300, or 10 per million of the population. The verdict in 162 of these cases was murder, and in 138 manslaughter, the exact verdict in two of the latter having been "excusable homicide." In respect of the 162 murders there were 16 executions.

Ill-defined and Unspecified Causes.—In 25,176 cases, or 4·5 per cent. of the total deaths, the cause of death was so unsatisfactorily stated as to be useless for purposes of scientific classification—the deaths are therefore referred to this heading. The average proportion in the ten years 1882–91 had been 5·2 per cent. The reduction was probably in great measure due to the issue from this office of 3523 letters of inquiry addressed to medical men concerning doubtful or obscure certificates of cause of death in 1892; the result of which proceeding has been the transference of a large number of entries from indefinite to definite headings. Thus, for example, 528 deaths were removed from more or less vague headings to cancer (or malignant disease), 93 to syphilis, and 218 to puerperal fever and accidents of childbirth.

Certification of Causes of Death.—Of the 559,684 deaths registered during the year 1892, the causes of 512,691, or 91·6 per cent., were certified by registered medical practitioners, and the causes of 31,892, or 5·7 per cent., by coroners after inquest, while the causes of the remaining 15,101 deaths, or 2·7 per cent., were not certified. The 15,101 uncertified cases in 1892 included deaths of infants who had been attended only by midwives, and those of persons attended by unregistered practitioners, as well as those of persons who had received no medical attendance of any kind in their last illness. In registration counties the proportions per cent. of uncertified deaths ranged from 0·8 in Middlesex, and 0·9 in London and in Wiltshire, to 4·3 in Derbyshire and in South Wales, 4·4 in Westmorland, 4·6 in Warwickshire, 4·8 in Herefordshire, and 5·7 in North Wales. Among counties in which the proportion of uncertified deaths was greater in 1892 than it had been in 1891 were Norfolk, Somersetshire, Warwickshire, Derbyshire, and the North Riding of Yorkshire; while considerable decrease was shown in Hertfordshire, Huntingdonshire, Gloucestershire, Lincolnshire, and Cumberland.

Offences against the Registration Act of 1874.—In 1892, 28 persons, on prosecution by order of the Registrar-General, were convicted of different offences against the Registration Acts, as under:—

For failing to give information for registration, and to comply with registrars' requisitions - -	2
For giving false information for registration - -	14
For refusing to give particulars necessary to complete the registration of a birth - - - -	1
For making and giving false certificates of cause of death - - - - - -	7
For burying as still-born a child born alive - -	1
For causing two bodies in one coffin to be buried without delivery of statutory notice - - -	1
For giving false declarations of still-birth - -	2
	28

Progress of Registration.

The names in the alphabetical indexes of births, deaths, and marriages recorded in the national register of England and Wales were increased in the year 1892 by 1,911,911, this addition raising the aggregate number of names in the indexes, which at the end of 1892 embraced a period of 55½ years, to 85,131,549. The number of searches in 1892 in the various registers was 50,942, exceeding the number in the previous year by 4442. The number of certificates issued was 34,678, showing an increase of 1967 on the number in 1891. The fees received for searches and certificates in 1892 and paid into Her Majesty's Exchequer amounted to 6,921*l.* 15*s.*,

exceeding the amount received in the previous year by 463*l.* 4*s.* 6*d.* (Table 26.)

A list of the various public registers and records lodged in the General Register Office, Somerset House, was published in the 34th Annual Report, pages xxi–xxii.

Mortality in the Army.*

The average strength of the Army, at home and abroad, was 213,540, and the deaths were 1950, the rate of mortality thus being 9·1 per 1000, against 8·7 and 8·9 respectively in the preceding two years. The mortality in the Army abroad was 13·5 per 1000, a rate 0·9 per 1000 above the mean rate in the three years 1889–91; while the rate in the Army at home was 4·7 per 1000, against 6·0 and 5·4 in the preceding two years. (Table 29.)

Mortality in the Navy.†

The average force afloat in 1892 was 58,330. The deaths were 326, being in the proportion of 5·59 per 1000 of the strength. Of the 326 deaths, 258 were due to disease, and 68 to violence; the death-rate from disease was therefore 4·42 per 1000, and that from violence 1·17 per 1000.

Of the 68 deaths from violence, 28 resulted from accidental drowning, 6 from heatstroke, 27 from other accidental causes, and 7 from suicide.

Births and Deaths of British Subjects at Sea.

Marine Register Book.—In accordance with the Births and Deaths Registration Act of 1874, commanding officers of ships trading to or from British ports are required, under a penalty, to transmit returns of all births and deaths occurring on board their ships to the Registrar-General of Shipping and Seamen, who furnishes certified copies of such returns to the Registrars-General of England, Scotland, and Ireland. Similar returns are furnished by persons having charge of Her Majesty's Ships directly to the Registrars-General of Births and Deaths. Such returns of births and deaths at sea constitute the "Marine Register Book." During the year 1892, 267 entries of birth and 4073 of death were added to this Register. Of the 4073 deaths, so far as could be judged from the entries, which are not always very precise, 1713 were of persons of English origin, while 188 others were of persons of British origin.

Mercantile Marine.—The Registrar-General of Shipping and Seamen reports that the number of masters and seamen afloat in registered vessels belonging to the mercantile marine of the United Kingdom, including the islands in the British Seas, during the year 1892 was 241,735, showing an increase of 1255 upon the number in the preceding year. The reported deaths among masters and seamen during 1892 numbered 3452, showing a rate of 14·3 per 1000 of the strength. This rate, though exceeding the mean rate in the five years 1887–91 by 0·3 per 1000, was lower than that in any year prior to 1888, with the single exception of the year 1852. (Table 31.)

Among *passengers* on board merchant vessels at sea 77 births and 412 deaths were reported in 1892, the births being 10 below, and the deaths 26 above, the numbers recorded in the preceding year. (Table 32.)

---

* Based upon returns furnished by His Royal Highness the Commander-in-Chief.

† Based upon returns furnished by the Director-General of the Medical Department of the Navy.

International Vital Statistics.

In Tables 39–56 will be found international vital statistics concerning the marriages, births, and deaths, and their rates per 1000 of the population, in most of the European States.

A comparison of the death-rate in 1892, in each country from which returns were received, with the death-rates in preceding years, shows that the mortality was generally somewhat above the average of recent years. In Denmark and in Switzerland the rates were lower than in 1891, while in France and in Italy there was no change; but Norway, Austria, the German Empire, the Netherlands, and Belgium all experienced an increased mortality.

In previous reports it has been pointed out that as the sex and age distribution of the population varies greatly in different countries, and as the rates largely depend on such distribution, the rates in one country cannot safely be compared with the rates in another, without correction for this difference in the constitution of the several populations.

In order to allow of fair comparison, it is most desirable that the several countries should agree upon some "Standard or Life Table population," that is to say, a population with fixed age and sex distribution, for international use; so that the birth, marriage, and death rates for each country may be calculated by this standard. I recommend this suggestion to the notice of the respective Governments.

I have the honour to be,

Sir,

Your faithful Servant,

BRYDGES P. HENNIKER,

Registrar-General.

General Register Office, Somerset House,
29th March, 1894.

Remarks on the Meteorology of the Year 1892.*

By James Glaisher, Esq., F.R.S., &c.

The following remarks, both with regard to atmospheric pressure and temperature, are based on observations made near London, but they may be taken as having a general application.

Atmospheric Pressure.—The readings of the barometer were below their averages till the 22nd of January, the mean daily deficiency being 0·21 in.; from January 23rd to the 31st it was above, the mean daily excess being 0·23 in.; from February 1st to March 16th it was generally below, being particularly so on the 2nd, 3rd, 18th, 19th, and 20th of February; and on the 10th and 13th of March, when it was as much as 0·67 in., 0·65 in., 0·80 in., 0·72 in., 0·62 in., 0·81 in., and 0·73 in. respectively below, the mean daily deficiency for the 45 days ending March 16th being 0·22 in.; from March 17th to April 5th it was generally above, the mean daily excess being 0·23 in.; from April 6th to the 17th it was below, the mean daily deficiency being 0·11 in.; from April 18th to June 15th it was generally above, the mean daily excess for these 59 days being 0·06 in.; from June 16th to July 20th it was generally below, the mean daily deficiency being 0·08 in.; from July 21st to August 12th it was above, the mean daily excess being 0·16 in.; from August 13th to November 6th it was generally below, the mean daily deficiency for these 86 days being 0·12 in.; from November 7th to December 2nd it was generally above, the mean daily excess being 0·16 in.; from December 3rd to the 13th it was generally below, the mean daily deficiency being 0·19 in.; from December 14th to the 28th it was above, the mean daily excess being 0·10 in.; and from December 29th to the 31st it was below its average, the mean daily deficiency being 0·21 in.

The highest reading of the barometer at the height of 150 feet above the sea was 30·368 ins. on March 31st; and the lowest was 28·962 ins. on February 18th. The yearly range was 1·406 in.

Temperature.—The temperature of the air was below its average till the 21st of January, being particularly so on the 9th, 10th, and 12th, when it was as much as 8°·3, 9°·6, and 9°·7 respectively below, the mean daily deficiency for the 21 days being 4°·4; from January 22nd to February 11th it was generally above, being particularly so on the 24th, 29th, 30th, and 31st of January, and on the 7th of February, when it was as much as 8°·2, 9°·7, 8°·9, 8°·0, and 8°·5 respectively above, the mean daily excess for the 21 days ending February 11th being 3°·5; from February 12th to 31st of March it was generally below, being particularly so from the 16th to the 20th of February, and from the 2nd to the 13th of March, the mean daily deficiency for these 17 days being 10°·9; and the mean daily deficiency for the 49 days ending March 31st being 4°·6; from April 1st to the 11th it was above, being particularly so on the 4th, 5th, and 6th, when it was as much as 8°·2, 10°·9, and 8°·3 respectively above, the mean daily excess for the 11 days ending April 11th being 4°·8; from April 12th to the 20th it was particularly below, the mean daily deficiency being 8°·6; from April 21st to the 24th it was above, being as much as 9°·1 above on the 22nd, the mean daily excess being 6°·0; from April 25th to May 7th it was below, being particularly so on the 28th and 29th of April and on the 5th and 6th of May, when it was as much as 9°·7, 9°·3, 9°·7, and 9°·3 respectively below, the mean daily deficiency for these 13 days being 6°·7; from May 8th to June 11th it was above its average, being as much as 14°·7 and 16° above on the 28th and 31st of

* For Meteorological Tables, *see* pp. lviii–lxiii.

May respectively, while on several other days it was as much as 10° and 11° above, the mean daily excess for the 35 days ending June 11th being 4°·2; from June 12th to August 13th it was generally below, being as much as 8° and 9° below on several days, the mean daily deficiency for these 63 days being 2°·8; from August 14th to the 25th it was generally above, the mean daily excess being 1°·7; from August 26th to September 9th it was below, the mean daily deficiency being 3°·3; from September 10th to the 27th it was generally above, the mean daily excess being 1°·6; from September 28th to October 27th it was below, being particularly so on the 18th, 19th, 24th, and 25th of October, when it was as much as 10°·6, 11°, 11°·3, and 12°·1 respectively below, and on several other days it was as much as 7°, 8°, and 9° below, the mean daily deficiency for the 30 days ending October 27th being 6°·7; from October 28th to November 17th it was generally above, being particularly so on the 28th and 29th of October, and on the 14th, 15th, and 16th of November, when it was as much as 8°·3, 9°·4, 9°·4, 10°·4, and 8°·0 respectively above, the mean daily excess for the 21 days ending November 17th being 2°·8; from November 18th to December 14th it was generally below, being particularly so on the 5th and 6th of December, when it was as much as 10°·4 and 9°·1 respectively below, the mean daily deficiency for these 27 days being 2°·6; from December 15th to the 21st it was above, being as much as 10°·3 above on the 15th, the mean daily excess being 4°·8; and from December 22nd to the 31st it was below, being particularly so from the 24th to the 30th, the mean daily deficiency for these 7 days being 10°·8; and the mean daily deficiency for the 10 days ending December 21st being 9°·1.

The highest temperatures of the air were at Cambridge 87°·0, at Blackheath 86°·8, and at Royston 86°·0; and the lowest were at Carlisle — 1°·0, at Stonyhurst 8°·1, and at Somerleyton 9°·6.

Rainfall.—The fall of rain was below its average in January, above in February, and below its average again in March; the total fall in the three months at Greenwich was 3·16 ins., or 1·79 in. below the average. The fall of rain was below its average in both April and May, and above its average in June; the total fall in the three months at Greenwich was 5·35 ins. or 0·43 in. below the average. The fall of rain was below its average in July, above in August, and below its average again in September. The total fall in the three months at Greenwich was 6·58 ins. or 0·74 inch below the average. The fall of rain was above its average in October, and below its average in both November and December; the total fall for the three months at Greenwich was 7·23 ins. or 0·15 inch above the average.

The heaviest falls of rain in the year at our stations were at Stonyhurst 48·68 ins., at Carlisle 34·88 ins., and at Halifax 34·59 ins.

The least falls were at Whitchurch 19·87 ins., at Oxford 20·73 ins., and at Nottingham 21·57 ins.

The greatest number of days of rain were at Liverpool 212, at Nottingham 203, and at Llandudno 200.

The smallest number of rainy days were 121 at Oxford, 134 at Barnet, and 136 at Osborne.

Thunderstorms occurred on 49 days at the different stations during the year; of these 10 were in June, 7 in each of the months of May, September, and October, 6 in July, 5 in August, 3 in both February and April, one in January, and none were reported in either March, November, or December.

Thunder was heard but lightning was not seen on 54 days during the year; of these 13 were in June, 9 in August, 7 in April, 6 in each of the months of May, July, and September, 4 in October, 2 in February, and one in March.

Lightning was seen but thunder was not heard on 49 days during the year; of these 8 were in both August and October, 7 in September, 6 in February, 5 in June, 4 in July, 3 in both March and May, 2 in both January and April, and one in November.

Solar halos were seen on 117 days during the year; of these 21 were in April, 16 in May, 12 in July, 10 in February, 9 in both March and June, 8 in each of the months of August, October, and December, 7 in both September and November, and 2 in January.

Lunar halos were seen on 69 days during the year; of these 11 were in November, 9 in both May and December, 8 in April, 7 in each of the months of February, March, and October, 6 in January, 2 in both July and September, and one in August.

Snow fell on 84 days during the year; of these 19 were in March, 16 in January, 15 in December, 14 in February, 13 in April, 3 in October, and 2 in both May and November. The last fall in the spring was on May 16th at Halifax; none fell in June, July, August, or September; and the first fall in the autumn was on October 23rd at Hereford.

Hail fell on 94 days during the year; of these 17 were in February, 12 in April, 11 in each of the months of January, March, and October, 9 in June, 7 in both May and December, 6 in September, 2 in November, and one in July.

Fog prevailed on 152 days during the year; of these 22 were in both November and December, 19 in January, 14 in February, 12 in both April and August, 11 in September, 10 in both June and October, 9 in March, 6 in May, and 5 in July.

* Deaths from this cause prior to 1881 were classed, partly with "Diseases of Respiratory System" and partly with "Ill-defined and not specified Causes."
† Deaths from these diseases prior to 1881 were classed with "Other Tubercular and Scrofulous Diseases."

TABLE 16.—ENGLAND.—**Annual Death-rates, from Various Causes, to a Million Persons living, 1868–92.**

(Decimals are omitted, the nearest whole number being taken. When the Deaths from any Cause were too few to give a rate of 0·5, a cipher is inserted.)

* The Populations of the counties have been estimated to the middle of 1892 from the numbers enumerated at the Censuses in 1881 and 1891.

TABLE 21.—ENGLAND.—**Death-rates of Persons, Males, and Females, from various Causes, 1892.**

CAUSE OF DEATH.	Deaths to 1,000,000 living. Persons.	Males.	Females.
ALL CAUSES - -	18982	20023	18003
Small-pox - - - -	15	18	12
Chicken-pox - - -	4	5	3
Measles - - - -	460	483	437
Epidemic Rose Rash -	3	3	2
Scarlet Fever - - -	190	196	185
Typhus - - - -	3	3	2
Relapsing Fever - -	0	0	–
Influenza - - - -	534	538	532
Whooping-cough - -	455	420	487
Mumps - - - -	3	3	3
Diphtheria - - -	222	221	223
Cerebro-spinal Fever -	1	1	1
Simple and Ill-defined Fever - - - -	8	8	8
Enteric Fever - - -	137	154	121
Other Miasmatic Diseases	1	1	1
Cholera - - - -	15	19	11
Diarrhœa, Dysentery -	505	549	464
Remittent Fever - -	1	1	1
Ague - - - - -	3	4	1
Hydrophobia - - -	0	0	0
Glanders - - - -	0	0	0
Splenic Fever - - -	0	0	0
Cow-pox and other Effects of Vaccination - -	2	2	2
Syphilis - - - - -	69	78	61
Gonorrhœa, Stricture of Urethra - - - -	10	21	0
Phagedæna - - -	2	2	2
Erysipelas - - -	50	54	47
Pyæmia, Septicæmia -	12	12	11
Puerperal Fever - -	80	-	155
Thrush - - - -	16	17	15
Other Dis. from Vegetable parasites - - -	0	0	0
Hydatid Disease - -	2	1	2
Other Dis. from Animal parasites - - -	3	3	3
Starvation, Want of Breast Milk - - - -	11	13	10
Scurvy - - - -	1	1	0
Intemperance { Chron. Alcoholism	52	60	45
Intemperance { Delirium Tremens	15	26	4
Rheumatic Fever, Rheumatism of Heart - -	86	91	80
Rheumatism - - -	35	32	38

NOTE.—*Up to and including* 1886 masters were excluded from the above employment and mortality figures; the latter of which contained some cases of men who died in colonial vessels and fishing vessels not registered under the Merchant Shipping Acts, whose crews are not included in the employment column.

Since 1886 masters are included in both columns, and the employment and mortality figures relate only to persons employed in vessels registered under the Merchant Shipping Acts belonging to the United Kingdom, the Isle of Man, and Channel Islands. Deaths on vessels employed on river or in inland navigation and on yachts are not included.

* The prices of Consols for the years 1841–52 relate to the 12 months beginning 1st April; from 1853 onwards the prices relate to calendar years. For the years 1841–88 the prices relate to stock bearing 3 per cent. interest, for 1889–92 to stock bearing 2¾ per cent.

† From the Board of Trade Statistical Abstract.

‡ The prices of coal are derived from Parliamentary Returns furnished by the Registrar of the London Coal Market, by order of the House of Commons.

§ Derived from Returns, published by the Local Government Board, of the number of persons in receipt of Relief on the last day of each week.

INTERNATIONAL VITAL STATISTICS.

Table 39.—Persons Married, Births, and Deaths per 1000 of the Population, in the UNITED KINGDOM and in OTHER EUROPEAN STATES.

(Tabulated from returns furnished by the authorities of the various States.)

Year.	United Kingdom.	England and Wales.	Scotland.	Ireland.	Denmark.	Norway.	Sweden.	Austria.	Hungary.	Switzerland.	German Empire.	Prussia.	The Netherlands.	Belgium.	France.	Italy.
	Persons married to 1000 living.															
Average in the 20 years 1871-90	14·4	15·6	13·9	9·0	15·2	13·7	13·1	16·3	19·1 (15yrs.)	14·7	16·4 (19yrs.)	16·7	15·1	14·2	15·4	15·6

NOTE.—An addition of territory containing a population of about 8000 was made in 1864, and the facts relating thereto are included in this Table from 1860. Previously to 1st January 1860, children who died within 24 hours after birth were counted as still-born.

* Census year.

† Cholera was epidemic in the year 1853, and war raged in the years 1850 and 1864.

NOTE.—The population in the four years 1862–65 and in the years 1867–69 is estimated by means of the average annual rate of increase observed between the two enumerations of 1861 and 1866. The deaths of Frenchmen abroad, civil or military, are registered in the books of the Commune in which they were last domiciled.

* Census year. † Cholera prevailed in 1865–66, and war raged in 1870 and 1871.

NOTE.—Statistics for the 7 years 1871-77 were not issued owing to the disturbed state of the country. The decline in registered marriages in 1870 is believed to be due to the introduction of civil registration, which occurred in that year.

NOTE.—The numbers for Rome were first included with those for the Kingdom of Italy in 1872. The population figures given for census years show the numbers enumerated on 31st December in each of those years; whereas for the end of each of the other years the population is estimated on the assumption that the rate of increase which prevailed in the last inter-censal period has since been maintained.
* Census year.

TABLE 57.—ENGLAND. **Changes** in the **Constitution** of **Registration Districts** and **Sub-districts** during the Year **1892.**

N.B.—(1.) The Name of the District is in SMALL CAPITALS, that of the Sub-district in *Italics*.
(2.) The Populations quoted are the revised Numbers enumerated at the Census of 1891.

No. of District.	NAME OF REGISTRATION DISTRICT.	Date of Change.	Nature of Change.
17	WHITECHAPEL - -	1892. 1 January -	The sub-districts of *Goodman's Fields* and *Aldgate* were united under the name of *Goodman's Fields* (population 13,800).
142	WYCOMBE - - -	1 October -	The parishes comprised within the Superintendent Registrar's District of WYCOMBE were re-arranged into four sub-districts, viz.:—1. *Wycombe* sub-district, consisting of the parishes of Wycombe, Chipping Wycombe, West Wycombe, Hughenden, and Little Missenden (aggregate population 21,909); 2. *Marlow* sub-district, consisting of the parishes of Great Marlow, Little Marlow, Wooburn, Hedsor, Fingest, Turville, and part of Stokenchurch (aggregate population 10,074); 3. *Princes Risborough* sub-district, consisting of the parishes of Princes Risborough, Monks Risborough, Wendover, Stoke Mandeville, Great and Little Hampden, Ellesborough, and Great and Little Kimble (aggregate population 7,172); and 4. *Stokenchurch* sub-district, consisting of the parishes of Bradenham, Ibstone, Bledlow, Chinnor, Horsendon, Illmire, Radnage, Saunderton, and part of Stokenchurch (aggregate population 5,236).
197	LEXDEN - -	1 May -	The parishes of Aldham, Chappel, and Great Tey (aggregate population 1,479) were transferred from *Fordham* sub-district to *Stanway* sub-district, and the sub-district of *Dedham* was added to the remaining portion of *Fordham* sub-district.
198	HALSTEAD - -	1 July -	The parish of Great Maplestead (population 406) was transferred from the sub-district of *Halstead* to that of *Hedingham*.
207	MILDENHALL - -	1 January -	The sub-districts of *Worlington* and *Lakenheath* were united under the name of *Mildenhall* (population 8,559).
378	MARTLEY - -	1 July -	The sub-districts of *Martley* and *Witley* were united under the name of *Martley* (population 6,082).
379	WORCESTER - - - -	1 April -	The sub-districts of *South-west Worcester* and *North Worcester* were united under the name of *Worcester* (population 43,966).
402 403 408 409	BILLESDON - - BLABY - - BARROW-UPON-SOAR - LEICESTER - -	1 January	The district of LEICESTER was extended under the provisions of the Leicester Extension Act, 1891, cap. c., viz.:—Parts of the parishes of Evington and Humberston from the *Billesdon* sub-district of BILLESDON, and of the parish of Belgrave from the *Rothley* sub-district of BARROW-UPON-SOAR (aggregate population 18,862) were added to *East Leicester** sub-district; and parts of the parishes of Knighton and Aylestone from the *Wigston* sub-district of BLABY, part of the parish of Braunstone, the parishes of Freake's Ground and Newfound Pool from the *Enderby* sub-district of BLABY, and the parish of Leicester Abbey from the *Rothley* sub-district of BARROW-UPON-SOAR (aggregate population 13,692) were added to *West Leicester** sub-district.
449 450	NANTWICH - - CHESTER.	1 July -	The parishes of Beeston, Burwardsley, Eaton, Rushton, Tarporley, Tilstone Fearnall, Tiverton, and Utkinton (aggregate population 4,103) were transferred from the *Bunbury* sub-district of NANTWICH to the *Tattenhall* sub-district of CHESTER.

* The parts of Evington, Humberston, and Belgrave added to *East Leicester* were re-named North Evington, West Humberston, and Belgrave respectively; the parts of Knighton and Aylestone added to *West Leicester* were re-named Knighton and Aylestone respectively; the part of Braunstone added to *West Leicester* was merged in the parish of St. Mary Leicester, and the parish of Freake's Ground added to *West Leicester* was merged in the parish of Leicester Abbey. The remainders of the parishes of Belgrave, Knighton, and Aylestone were merged in other parishes in the districts to which they originally belonged.

Table 57.—ENGLAND. Changes in the Constitution of Registration Districts and Sub-districts during the Year 1892—*continued.*

No. of District.	NAME OF REGISTRATION DISTRICT.	Date of Change.	Nature of Change.
451	WIRRAL - - -	1892. 1 December	The old sub-district of *Eastham* was divided into two sub-districts, viz.:—The new sub-district of *Eastham*, consisting of the parishes of Great Sutton, Little Sutton, Whitby, Overpool, Netherpool, Childer-Thornton, Hooton, and Eastham (aggregate population 10,046), and the new sub-district of *Bebington*, consisting of the parishes of Bromborough, Brimstage, Poulton-cum-Spittle, Lower Bebington, Higher Bebington, and Storeton (aggregate population 12,194).
470	ROCHDALE - -	1 August -	The sub-districts of *Butterworth Freehold Side* and *Butterworth Lordship Side* were united under the name of *Butterworth* (population 9,438).
497A 497B	BRADFORD - - - NORTH BIERLEY -	1 January	The BRADFORD District was divided into two Registration Districts, viz.:—BRADFORD REGISTRATION DISTRICT, consisting of the parishes, townships, or places in the Bradford Union (aggregate population 202,975), and NORTH BIERLEY REGISTRATION DISTRICT, consisting of the parishes, townships, or places in the North Bierley Union (aggregate population 138,906).
577	EAST WARD - -	1 January -	The parish of Asby (population 424), was transferred from the sub-district of *Orton* to that of *Appleby*.
580	CHEPSTOW - - -	1 June -	The sub-district of *Chepstow* was dissolved, and of the parishes of which it was constituted Tidenham and Lancaut (aggregate populaton 1,740) were added to *Lydney* sub-district, and the remaining parishes, viz.:—Trelleck Grange, Tintern Parva, Chapel Hill, Penterry, St. Arvans, St. Kingsmark, St. Arvans Grange, Chepstow, Mounton and Mathern and St. Pierre (aggregate population 5,442) were added to *Shire Newton* sub-district, which was re-named *Chepstow* sub-district.
584	PONTYPOOL - -	1 March -	The parish of Panteg (population 3,746) was transferred from *Pontypool* sub-district to *Llangibby* sub-district.
598	NARBERTH - - -	1 January -	The parishes of Llanfallteg East and Llanfallteg West (aggregate population 377) were transferred from the sub-district of *Llanboidy* to that of *Narberth*, and the remainder of *Llanboidy* sub-district was united with *Llandissilio* sub-district under the name of *Llanboidy* (population 6070).
608	BRECKNOCK - -	1 December	The sub-district of *Merthyr Cynog* was abolished, and the parishes formerly comprised therein were rearranged as follows:—Llanfihangel Nantbran (population 317), was added to *Devynnock* sub-district, and the parishes of Merthyr Cynog, Garthbrengy, and Llanfihangelfechan (aggregate population 951) were added to *Brecknock* sub-district.
609	CRICKHOWELL - -	1 January -	The sub-district of *Llangattock* was abolished, the part known as Lower Llangattock (population 968) being transferred to *Crickhowell* sub-district, and the remaining part known as Upper Llangattock (population 4,180) to *Llanelly* sub-district.

NOTE.—No change affecting the population of any Registration District or Sub-district was made during 1892 under the provisions of the Divided Parishes and Poor Law Amendment Acts, 1876 and 1879, but a small change was made between the two sub-districts in the district of BLABY under the provisions of the Leicester Extension Act, 1891.

* The *Registration Counties* consist of groups of Registration Districts, which are generally co-extensive with the Poor Law Unions. A District which extends into two or more Geographical Counties is included entirely in that Registration County in which the principal town of the District, or the greater part of the population, is located. The boundaries of the Registration Counties differ therefore more or less from the boundaries of the Geographical Counties. For areas and populations of the Registration Divisions and Counties, *see* pages 64-67.

* The 633 *Registration Districts* (Paddington 1a, North Bierley 497b, and Holyhead 631 having been constituted Registration Districts since the numerical arrangement 1 to 630 was adopted on 1st January 1881) are collections of contiguous Parishes or Places combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are arranged, according to the local position, under the Registration Counties. The Registration Sub-districts (2111 in number at the end of the year 1892) are sub-divisions of Registration Districts, within which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter *W* denotes that the Sub-district contains within its limits a Workhouse Establishment belonging to the District or Union; *w* indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; *H* indicates a Hospital or Infirmary; *L* a Lunatic Asylum; and repetitions of these letters show the number of such Institutions in each Registration sub-district.

† The Deaths in the principal Institutions in England in 1892 are given on pages 71-94.

* 449 : 3 and 450 : 1.—On 1st July 1892 the parishes of Beeston, Burwardsley, Eaton, Rushton, Tarporley, Tilstone Fearnall, Tiverton, and Utkinton were transferred from *Bunbury* sub-district, in the district of NANTWICH, to *Tattenhall* sub-district, in the district of CHESTER. The births and deaths are shown as if the change had taken place at the beginning of the year.

† 450.—The District of CHESTER comprises the three Poor Law Unions of Tarvin (Tattenhall sub-district), Chester (Chester Castle and Chester Cathedral sub-districts), and Hawarden (Hawarden sub-district).

‡ 451 : 2, 3.—On 1st December 1892 the sub-district of Eastham was divided into two sub-districts called (2) Eastham and (3) Bebington. The births and deaths are shown as if the change had taken place at the beginning of the year. For details of the change, *see* Table 57, pp. lxxvii-lxxviii.

* 608 : 1, 2.—On 1st December 1892 the sub-district of *Merthyr Cynog* was abolished, and the parish of Llanfihangel Nantbran was added to *Devynnock* sub-district, and the parishes of Merthyr Cynog, Garthbrengy, and Llanfihangelfechan to *Brecknock* sub-district. The births and deaths are shown as if the change had taken place at the beginning of the year.

† 609 : 3, 4.—On 1st January 1892 the sub-district of *Llangattock* was abolished, the part known as *Lower Llangattock* being transferred to *Crickhowell* sub-district, and the remaining part, viz., *Upper Llangattock*, to *Llanelly* sub-district.

DEATHS IN WORKHOUSES, HOSPITALS, AND PUBLIC LUNATIC ASYLUMS.

1892.

The following Table shows the numbers of deaths (Persons, Males, and Females) registered during 1892 in the Workhouses, Hospitals, and Public Lunatic Asylums of England. These figures afford the means of correcting the mortality of districts and sub-districts in which these Institutions are situated. The Table includes 1871 Institutions; of which 752 are Workhouses, Workhouse Infirmaries, or Workhouse Schools; 1025 Hospitals or Infirmaries; and 94 Lunatic Asylums. The Lunatic Asylums are mostly County Asylums, but a few private Asylums which receive pauper patients (held on that account to be public for the purposes of this Table) are also included. In these 1871 Institutions 66,424 deaths were registered during the year, or 11·9 per cent. of the total deaths in England and Wales, against 11·6 and 11·7 per cent. in the preceding two years; 39,748 occurred in Workhouses, 20,440 in Hospitals, and 6236 in Lunatic Asylums. The proportion to total deaths was 7·1 per cent. in Workhouses, 3·7 in Hospitals, and 1·1 in Lunatic Asylums. The proportion of deaths recorded in Workhouses, which had been 7·0 and 7·1 per cent. in 1890 and 1891, was also 7·1 per cent. in 1892.

Information relating to the deaths recorded in many Private Lunatic Asylums, Private Asylums for Idiots and Imbeciles, and in a few other institutions, will be found in the notes to the following pages.

Deaths in Workhouses, Hospitals, and Public Lunatic Asylums, 1892.

* When a person dies from an operation performed on account of any disease or injury the nature of which is stated in the certificate, the death is classed under that disease or injury.

OF the above 11,510 ACCIDENTS, 129 are stated to have occurred to Men in a state of INTOXICATION, and 22 to Men suffering from DELIRIUM TREMENS. And in 296 other cases Death was accelerated by the supervention of ERYSIPELAS, MORTIFICATION, PYÆMIA, or TETANUS. Here follow the details:—

Causes inducing or accelerating Deaths from Accident.	All Ages.	Total under 1 Year. Infants under 1 Month.	Others.	1–	2–	3–	4–	Total under 5 Years.	5–	10–	15–	20–	25–	35–	45–	55–	65–	75–	85 and upwards.

* When a person dies from an operation performed on account of any disease or injury the nature of which is stated in the certificate, the death is classed under that disease or injury.

OF the above 4833 ACCIDENTS, 61 are stated to have occurred to Women in a state of INTOXICATION, but not one to Women suffering from DELIRIUM TREMENS. And in 117 other cases Death was accelerated by the supervention of ERYSIPELAS, MORTIFICATION, PYÆMIA, or TETANUS.* Here follow the details:—

Causes inducing or accelerating Deaths from Accident.	All Ages.	Total under 1 Year. Infants under 1 Month.	Others.	1–	2–	3–	4–	Total under 5 Years.	5–	10–	15–	20–	25–	35–	45–	55–	65–	75–	85 and upwards.
Intoxication at time of Accident	61	-	-	-	-	-	-	-	-	-	1	1	6	15	18	11	7	2	-
Acceleration by Erysipelas	27	-	1	-	-	-	-	1	-	-	-	-	5	2	3	7	7	2	-
Acceleration by Mortification	9	-	-	-	-	-	-	-	-	-	-	-	1	1	1	3	2	1	-
Acceleration by Pyæmia	52	-	-	3	-	3	1	7	4	3	2	1	6	7	5	8	6	3	-
Acceleration by Tetanus*	29	1	-	-	3	3	1	8	4	3	2	-	1	4	3	2	1	-	1

* Cases of Tetanus which are not stated to be the result of injury are classed as "Idiopathic Tetanus" in the Table of Causes of Death (*see* page 115).

INDEX OF REGISTRATION DISTRICTS.

The following Index furnishes a reference to the *Number* of each REGISTRATION DISTRICT in the topographical arrangement adopted in the Tables of Abstracts contained in the Report.* The alphabetical arrangement places compound names in the order in which they are pronounced: thus, East Ashford will be found under the letter E, and *not* under A.

In consequence of numerous alterations (amalgamations of districts and formations of new districts) since the numerical arrangement, 1 to 623, was adopted in the Abstracts for the year 1847, the districts were re-numbered consecutively from 1 to 630 in the Abstracts for the year 1881. Since that date three new Registration Districts have been formed, the District of Kensington (1) having been divided into Paddington (1*a*) and Kensington (1*b*), the District of Bradford (497) into Bradford (497*a*) and North Bierley (497*b*), and the District of Anglesey (630) into Anglesey (630) and Holyhead (631).

For names of Towns, such as Bournemouth, Maidenhead, &c., which are not found in this "Index of Registration Districts," see the "Index of Registration Sub-districts" (pp. 208–217) *and "Index of certain Towns"* (pp. 218, 219).

INDEX OF REGISTRATION SUB-DISTRICTS.

[This alphabetical arrangement places the Registration Sub-Districts (or Registrars' Districts) having *compou names* in the order indicated by the usual pronunciation of those names; thus, East Grinstead will found under the letter E, and not under G; St. James under the letter S, and not as "James, St." Th number against each Sub-District, in the third column, refers to its numerical place in the Tables Abstracts; thus, Abbey Holme (573 2) is the 2d Sub-District of the Wigton District, No. 573.]

Sub-District.	District.	No.
A		
Abbey Holme	Wigton	573; 2
Abbots Bromley	Uttoxeter	366; 2
Abbotsbury	Weymouth	264; 4
Abbots Langley	Watford	137; 4

GENERAL INDEX

TO

REGISTRAR-GENERAL'S FIFTY-FIFTH ANNUAL REPORT (1892).

PAGES

ACCIDENT; Mortality from (Abstracts, pp. 193–199) xvii

AGES; Mean, at Marriage and Re-marriage, continued increase of . . vii
at Death. (Tables 11–14, pp. xxxvi–xxxix) ix
remarkable changes in Mortality Rates from those of recent years in certain groups of Ages ix
of 441,792 of the Persons married in 1892, distinguishing previous Civil Condition 68–70
at Death, of each sex, in Divisions and Counties, 1892 . . . 96–105
(*See also* DEATH RATES.)

AREA of United Kingdom and its parts. (Table 1.) . . . xxvi–xxvii
of Town and Country Districts in England and Wales. (Table 25.) . liii
of Islands in the British Seas. (Table 27.) lv
of each District and Sub-district in England and Wales . . . 4–63
of each Division and County in England and Wales . . . 64, 66

ARMY, THE; Strength and Mortality of. (Table 29, p. lvi.) . . . xix

AUSTRALIAN COLONIES AND NEW ZEALAND; English Emigrants to. (Table 28.) lv

AUSTRIA; Population, Marriages, Births, and Deaths. (Tables 39, 47.) . lxv, lxx

BANKERS' CLEARING HOUSE, 1868–92. (Table A.) vi

BELGIUM; Population, Numbers and Proportions of Marriages, Births, and Deaths. (Tables 39, 53.). . . . . lxv, lxxiv

BIRTHS in England and Wales, 1892. (Abstracts, pp. 2–63.) . . . viii
Illegitimate. (Abstracts, pp. 2–63.) ix
Sex proportions and Counties with the highest and lowest proportions of Male Births. (Tables 2, p. xxviii, 3, p. xxix, 10, p. xxxv.) viii
Premature; increasing mortality ascribed to xvii
Aggregate Number of Names on Registers. (Table 26.) . . liv
in Islands in the British Seas. (Table 27.) lv
of British Subjects at Sea. (Table 32, p. lvii.) xix
(*See also* MARINE REGISTER BOOK.)
in United Kingdom and its parts, and in other European States. (Tables 40–56.) . . . . . lxvi–lxxvi

BIRTH-RATES; Total, Legitimate, and Illegitimate. (Tables 2, p. xxviii, 3, 4, p. xxix, 10, p. xxxv.) . . . . . viii–ix
affected by recent increased Marriage-rate viii
highest in industrial, and lowest in agricultural counties . . viii
in United Kingdom and its parts, and in other European States. (Tables 39–56) . . . . . lxv–lxxvi

PAGES

CANCER; high Mortality in 1892 xvii
annual deaths and death-rates, 1868–92. (Tables 15, 16) . . xl–xliii

CAUSES OF DEATH; Mortality from the several Classes of, 1882–92. (Table B.) . . . . . x–xviii
deaths from various in each year, 1868–92. (Table 15) . . xl–xli
annual death-rates from various, 1868–92. (Table 16) . . xlii, xliii

CERTIFICATES of Marriages, Births, and Deaths issued in 1892 . . xviii

CERTIFICATION of Causes of Death xviii
doubtful or obscure certificate, letters of enquiry concerning. . xviii
counties showing the largest proportions of the 15,101 uncertified causes of death xviii

CHANGES in Constitution of Registration Districts in 1892. (Table 57.) lxxvii–lxxviii

CHICKEN-POX; Deaths from in 1892 xi

CHILDBIRTH and Puerperal Fever, high Mortality from. (Table 23, p. lii.) xvi

CIRCULATORY ORGANS; excessive Mortality from diseases of . . . xvii

COAL; prices of, 1841–92. (Table 38.) lxiv

CONGENITAL DEFECTS; increasing Mortality from xvii

CONSOLS; prices of, 1841–92. (Table 38.) lxiv

CONSTITUTIONAL DISEASES; Mortality ascribed to, 1882–92. (Table B., p. x.) xvii

COUNTRY DISTRICTS; Mortality in. (Tables 24, 25, p. liii.) . . . ix

CROUP; Mortality from in 1892 xiv
(*See* CAUSES OF DEATH TABLES.)

DEATHS; in England and Wales, 1892 (Abstracts, pp. 2–63) . . . ix
from various Causes in England and Wales. (Table 15, pp. xl–xli) x–xviii
Certification of Causes of xviii
of British Subjects at Sea. (Tables 31, 32, p. lvii.) . . . xix
(*See also* MARINE REGISTER BOOK.)
Proportional Number from various Causes to 1,000,000 Deaths from all Causes, 1892. (Table 22.) li
Aggregate Number of Names on Registers, 1842–92. (Table 26.) liv
in Islands in the British Seas. (Table 27.) lv
in United Kingdom and its Parts, and in other European States. (Tables 40–56.) . . . . . lxvi–lxxvi
in Public Institutions 71–94
in Divisions and Counties, classified according to sex and age . 96–105
in England and Wales, classified according to sex, age, and cause . 108–121
in London, classified according to sex, age, and cause . . . 122–135
in Registration Counties, classified according to sex and cause . 136–159
from several causes in Divisions, Counties, and Districts . . 160–192
in England and Wales from Accident, Suicide, Murder, and Manslaughter, distinguishing method, sex, and age 193–205

DEATH RATES; in 1892. (Table 2, p. xxviii.) ix
of Males and Females compared. (Table 2, p. xxviii.) . . ix
in groups of ages. (Tables 11–14, pp. xxxvi–xx ix.) . . ix
remarkable changes in, from those of recent years in certain age groups ix
among infants ix
in Urban and Rural Districts. (Tables 24, 25, p. liii.) . . ix

PAGES

DEATH-RATES—*continued.*

from Classes of Causes (1882–92, Table B., p. x.) . . . x–xviii

in Army and Navy in series of years. (Tables 29, 30, p. lvi.) . xix

in Merchant Service. (Table 31, p. lvii.) xix

in European States. (Tables 39–56, pp. lxv–lxxvi.) . . . xx

in years 1838–92, in groups of years, and in quarters. (Tables 2, 3, 4.) . . . . . xxviii–xxix

from various Causes in England and Wales, 1868–92, and in groups of years, 1858–90. (Tables 16, 17.) . . . . . xlii–xlv

from the Principal Zymotic Diseases in England and Wales, 1838–92. (Table 18.) xlvi

from the Principal Zymotic Diseases in London, 1842–92. (Table 19.) xlvii

from several Causes, in Counties, 1892. (Table 20.) . . . xlviii–xlix

of Persons, Males, and Females, 1892, classified according to Cause. (Table 21.) l

from Measles, Scarlet Fever, "Fever," Whooping-cough, and Puerperal Fever and Childbirth in Counties, 1882–91 and in 1892. (Table 23.) lii

(*See also* INFANT MORTALITY.)

DENMARK; Population, Numbers, and Proportions of Marriages, Births, and Deaths. (Tables 39, 44.) . . . . . lxv, lxviii

DENSITY OF POPULATION; Persons to a square Mile, 1851–92. (Table 24.) liii

DEVELOPMENTAL DISEASES; Mortality ascribed to. (Table B., p. x.) . xvii

DIABETES; Mortality in 1892, the highest on record xvii

DIARRHŒAL COMPLAINTS; Mortality from, exceptionally low . . . xvi

(*See* CAUSES OF DEATH TABLES.)

DIETETIC DISEASES; Mortality ascribed to (1889–92, Table B., p. x.) . xvi

DIPHTHERIA; increased Mortality ascribed to in 1892 xiii

increase partly apparent owing to transference from Croup . . xiv

changes in local incidence of xiv

annual deaths and death-rates, 1868–92. (Tables 15, 16) . . xl, xlii

(*See* CAUSES OF DEATH TABLES.)

DISTRICTS, REGISTRATION; Alphabetical Index of 206–209

DIVORCED PERSONS; Re-marriages of vii

DYSENTERY. (*See* DIARRHŒAL COMPLAINTS.)

EDUCATION; as shown by Signatures in Marriage Registers . . . viii

EMIGRATION from United Kingdom, 1873–92. (Table 28.) . . . lv

ENTERIC FEVER; mortality from in 1892 lowest on record . . . xii

Mortality from, compared, in three periods 1869–78, 1879–84, 1885–91. (Table C.) xii

Counties showing maximum rates in 1892, compared with 1891 . xiii

local areas specially subject to, 1890–91–92. (Table D.) . . xiii

(*See* CAUSES OF DEATH TABLES.)

EUROPEAN STATES; Populations, Numbers, and Proportions of Marriages, Births, and Deaths. (Tables 39–56.) . . . . lx–lxxvi

EXECUTIONS in 1892 . . . . . xvii; 120, 121

EXPORTS of British Produce, value per head compared with marriage-rate (Table A.) . . . . . v–vi

PAGES

FEES received at General Register Office. (Table 26, p. liv.) . . . xviii

FEVER; Mortality from, in Counties, 1882–91 and in 1892. (Table 23.) . lii
(*See also* ENTERIC FEVER and CAUSES OF DEATH TABLES.)

FRANCE; Population, Numbers and Proportions of Marriages, Births, and Deaths. (Tables 39, 54.) . . . . . lxv, lxxv

GERMAN EMPIRE; Population, Numbers and Proportions of Marriages, Births, and Deaths. (Tables 39, 50.) . . . . . lxv, lxxii

GLAISHER, JAMES, Esq., F.R.S.; Meteorology of 1892. (Tables 33–37, pp. lviii–lxiii.) . . . . . xxi–xxiii

GUERNSEY and ADJACENT ISLANDS; Area, Population, Baptisms, and Deaths. (Table 27.) lv

HOMICIDE; Deaths ascribed to in 1892 xvii

HOLLAND. (*See* NETHERLANDS.)

HOSPITALS, Deaths in 71–94

HUNGARY; Population, Numbers and Proportions of Marriages, Births, and Deaths. (Tables 39, 48.) . . . . . lxv, lxxi

HYDROPHOBIA; decreased Mortality from xvi
(*See* CAUSES OF DEATH TABLES.)

ILL DEFINED and NOT SPECIFIED CAUSES; Deaths ascribed to and result of applications for fuller Information than that afforded by the Medical Certificates xviii

ILLEGITIMATE BIRTHS. (*See* BIRTHS.)

IMPORTS; Value of, per head of Population, 1860–92. (Table A.) . . vi

INDEXES; Additions to in 1892, and aggregate number of Names in . . xviii
Searches in. (Table 26, p. liv.) xviii
to Districts, Sub-Districts, and certain Towns 206–221

INFANTILE MORTALITY; continued excess of, in 1892 lx
in Counties (Table 10) xxxv
in England, 1838–92. (Table 18.) xliv
in London, 1842–92. (Table 19.) xlvii

INFLUENZA; Epidemics in 1890, 1891, and 1892, in Urban and Rural Districts x
accompanied by increased fatality of some other diseases especially those of the respiratory organs xv
course of the epidemic, 1890–91–92, in London and two other areas xv
Mortality attributed to, and to diseases of respiratory organs, 1890–91–92, compared with that of 1889 as a standard, and showing excess in Epidemic years. (Table E.) . . . xv
London and southern area suffered greatest mortality from . . xvi
Deaths from Epidemic 1890–91–92, estimated at about 110,000, and reasons for the estimate xvi
(*See* CAUSES OF DEATH TABLES.)

INQUESTS; in 1892 xviii
in Divisions, Counties, and Districts 160–192

INSTITUTIONS, PUBLIC; Deaths in 71–94

PAGES

INTEMPERANCE; High Mortality directly ascribed to xvii
Annual death-rates, 1868–92. (Table 16) xlii

INTERNATIONAL VITAL STATISTICS. (Tables 39–56, pp. lx–lxxvi.) . . xx
difficulty of comparing, owing to variations of sex and age distribution, and desirability of adopting a "Standard or Life-table Population" for international use xx

INTOXICATION; Accidental Deaths while in a state of 196, 199

IRELAND; Area, Population, Numbers and Proportions of Marriages, Births, and Deaths. (Tables 1, 39, 43.) . . . . . xxvii, lxv, lxvii

IRISH EMIGRANTS from United Kingdom, 1873–92. (Table 28.). . . lv

ISLANDS in BRITISH SEAS; Area, Population, Births, and Deaths. (Table 27.) lv

ITALY; Population, Numbers and Proportions of Marriages, Births, and Deaths. (Tables 39, 56.) . . . . . lxv, lxxvi

JERSEY; Area, Population, Births, and Deaths. (Table 27.) . . . lv

JEWS; increase of marriages among vii
increase in proportion of. vii

JEWISH MARRIAGES; increase of vii

LEGITIMATE BIRTHS. (*See* BIRTHS.)

LOCAL DISEASES; Mortality from, lower than in 1890–91. (Table B., p. x.) xvii

LONDON; Mortality from principal Zymotic Diseases, and Infant Mortality, 1842–92. (Table 19.) xlvii
Deaths in, classified according to Sex, Age, and Cause . . 122–135
Deaths in, from several Causes, and Inquests, in 1892 . . 160

LUNATIC ASYLUMS, PUBLIC; Deaths in 71–94

MAN, ISLE OF; Area, Population, Births, and Deaths. (Table 27.) . . lv

MANSLAUGHTER; Deaths ascribed to, in 1892 . . . . . xvii; 204, 205

MARINE REGISTER BOOK; entries of Births and Deaths in, 1892 . . xix

MARRIAGES; number registered in England and Wales, 1892. (Abstracts, pp. 2–67.) v
forms of celebration of. (Tables 5, 6, pp. xxx, xxxi; Abstracts, pp. 64–67.) vii
further decline of Roman Catholic vii
stationary among Dissenting denominations vii
increase of Jewish, indicating increase of Jewish population. . vii
First Marriages and Re-Marriages. (Table 7, p. xxxii; Abstracts, pp. 64–67.) vii
of Divorced Persons vii
Ages at Marriage, proportions stated and not stated . . . vii
increasing tendency to defer marriage vii
of Minors declining. (Tables 7, 8, pp. xxxii, xxxiii; Abstracts, pp. 64–67.) vii
of Minors; comparative prevalence of, in certain counties. (Table 8, p. xxxiii.) vii
(*See also* AGES and SIGNATURE by MARK.)
Buildings registered for Solemnisation of. (Table 9, p. xxxiv) . viii
in United Kingdom and its parts, and in other European States. (Tables 40–56.) . . . . . lxvi–lxxvi

PAGES

MARRIAGES—*continued.*

Aggregate number of Names of Persons married, on Registers, 1843–92. (Table 26.) liv

Conditions and ages of 441,792 of the Persons married . . 68–70

MARRIAGE-RATES; decline of, in 1892. (Tables 2, 3, 4, 8, pp. xxviii, xxix, xxxiii.) v

Counties with the highest and the lowest rates in 1892 . . v

Fluctuations of, compared with commercial fluctuations. (1860–92, Table A.) . . . . . v–vi

in the United Kingdom and its parts, and in other European States. (Tables 39–56.) . . . . . lxv–lxxvi

MEASLES; mortality from, in 1892 xi

Comparison of County distribution of, in recent epidemics . . xi

high minimum death-rates from, found in unbroken populous areas xi

high maximum death-rates due to insanitary conditions . . xi

local incidence somewhat analagous to that of whooping cough . xiv

15 Counties most affected by, 1882–91 xiv

Annual deaths and death-rates, 1868–92. (Tables 15, 16.) . . xl, xlii

Mortality from, in Counties, 1882–91 and 1892. (Table 23.) . lii

MEAT; Average Prices of, 1850–92. (Table 38.) lxiv

MERCANTILE MARINE; Strength and Mortality, and Births and Deaths of British Subjects at Sea. (Tables 31, 32, p. lvii.) . . . xix

METEOROLOGY of 1892, by James Glaisher, Esq., F.R.S. (Tables 33–37, pp. lviii–lxiii.) . . . . . xxi–xxiii

MORTALITY. (*See* CAUSES OF DEATH, AND DEATH-RATES.)

MURDER; Deaths ascribed to . . . . . xvii; 202, 203

NAVY, THE; Mortality in. (Table 30, p. lvi.) xix

NEGLIGENCE; Deaths from. (*See* ACCIDENT.)

NERVOUS SYSTEM; mortality from diseases of, very low in 1892 . . xvii

NETHERLANDS, THE; Population, Numbers and Proportions of Marriages, Births, and Deaths. (Tables 39, 52.) . . . . . lxv, lxxiii

NEW ZEALAND. (*See* AUSTRALIAN COLONIES.)

NORTH AMERICAN COLONIES; English Emigrants to. (Table 28.) . . lv

NORWAY; Population, Numbers and Proportions of Marriages, Births, and Deaths. (Tables 39, 45.) . . . . . lxv, lxviii

OFFENCES against the Registration Acts, and Convictions in 1892 . . xviii

OLD AGE; Mortality from, in 1892 xvii

PARASITIC DISEASES; Mortality from, in 1892, unprecedentedly low . xvi

Annual Mortality in each year, 1882–92. (Table B.) . . x

Annual Mortality in each year, 1868–92. (Table 16.) . . xlii

PAUPERISM; Proportion to Population, 1849–91. (Table 38.) . . . lxviii

PHTHISIS; Mortality from, in 1892, the lowest on record xvii

Annual deaths and death-rates in each year, 1868–92. (Tables 15, 16.) . . . . . xl, xlii

POPULATION in 1892, and method of Estimating v

Probable increase of Jewish vii

estimated, of United Kingdom, and its Parts, distinguishing Sex, 1843–92. (Table 1.) . . . . . xxvi–xxvii

PAGES

POPULATION—*continued.*
of Registration Counties, 1892. (Table 20.) . . . . xlviii–xlix
of Town and Country Districts, 1892. (Table 25.) . . . liii
1861–71–81–91, in Islands in British Seas. (Table 27.) . . lv
of United Kingdom, and its parts, and of other European States. (Tables 40–56.) . . . . . lxvi–lxxvi
enumerated in 1891, in Districts and Sub-districts . . . 4–63
enumerated in 1891, in Registration Divisions and Counties . . 64, 66

PREMATURE BIRTH; increasing Mortality ascribed to xvii

PRICES; of Consols, Wheat, and Coal, 1841–92; and of Meat, 1850–92. (Table 38.) lxiv

PRUSSIA; Population, Numbers and Proportions of Marriages, Births and Deaths. (Tables 39, 51.) . . . . . lxv, lxxii

PUBLIC INSTITUTIONS. (*See* INSTITUTIONS.)

PUERPERAL FEVER and Accidents of Childbirth; high Mortality from, in 1892 xvi

REGISTERS; Aggregate number of Names upon. (Table 26, p. liv.) . . xviii
and RECORDS in General Register Office xix

REGISTRATION; Progress of. (Table 26, p. liv.) xviii

REGISTRATION ACT; Offences against, and Convictions in 1892 . . xviii

RE-MARRIAGES. (*See* MARRIAGES.)

RESPIRATORY DISEASES; excessive Mortality from, probably due to Influenza xv
Mortality attributed to, and to Influenza, 1890–91–92, compared with that of 1889 as a standard, and showing excess in Epidemic years. (Table E.) xv
Mortality lower than in 1890–91, but still excessive . . . xvii

RURAL MORTALITY. (Tables 24, 25, p. liii.) ix
during the Influenza epidemics, 1890–91–92 x

SCARLET FEVER; increased Mortality from, in 1892 xi
in London; increase in the proportion of deaths occurring in Hospitals xi
its character of a mild type xi
case-mortality from, in Metropolitan Asylums Hospitals . . xi
local incidence analogous to that of Measles xii
Counties showing excessive Mortality from xii
peculiar tendency to spread among mining populations . . xii
Annual deaths and death-rates, 1868–92. (Tables 15, 16.) . . xl, xlii

SCOTCH EMIGRANTS from United Kingdom, 1873–92. (Table 28.) . . v

SCOTLAND; Area and Population, distinguishing Sex, 1843–92. (Table 1.) xxvii
Population, Numbers and Proportions of Marriages, Births, and Deaths. (Tables 39, 42.) . . . . . lxv, lxvii

SEA; Births and Deaths of Passengers (British Subjects) at. (Table 32, p. lvii.) xix
(*See also* MARINE REGISTER BOOK.)

SEAMEN. (*See* NAVY and MERCANTILE MARINE.)

SEARCHES in the Indexes and Certificates issued in 1892. (Table 26, p. liv.) xviii

SEX; Birth proportions vary in different localities viii
Death proportions ix

PAGES

SIGNATURE BY MARK in Marriage Registers. (Tables 7, 8, pp. xxxii–xxxiii; abstracts, pp. 64–67.) viii

SMALL-POX; increased mortality from, in 1892 xi

Proportions returned as Vaccinated, Unvaccinated, and "not stated" xi

Regrettable neglect of Medical Men to certify as to Vaccination . xi

Annual deaths from, and death rates, 1868–92. (Tables 15, 16.) . xl, xlii

SPAIN; Population, Numbers and Proportions of Marriages, Births, and Deaths. (Table 55.) lxxvi

SPECIFIC FEBRILE DISEASES. (*See* ZYMOTIC DISEASES.)

SUB-DISTRICTS, REGISTRATION; Alphabetical List of 210–219

SUICIDE, Deaths by, in 1892 . . . . . 200, 201

SWEDEN; Population, Numbers and Proportions of Marriages, Births, and Deaths. (Tables 39, 46.) . . . . . lxv, lxix

SWITZERLAND; Population, Numbers and Proportions of Marriages, Births, and Deaths. (Table 39, 49.) . . . . . lxv, lxxi

TOWNS whose names differ from those of the Districts and Sub-districts in which they are situated, Index of 220–221

TOWN AND COUNTRY DISTRICTS; Area, Population, and Death-rates. (Tables 24, 25, p. liii.) ix

Incidence of Influenza Epidemics, 1890–91–92, in . . . ix

TYPHUS; Annual deaths and death-rates, 1868–92. (Tables 15, 16.) . xl, xlii

UNCERTIFIED CAUSES OF DEATH xviii

UNITED KINGDOM; Emigration from. (Table 28.) lv

Strength and Mortality of Army in. (Table 29, p. lvi.) . . xix

Area; and Population, distinguishing Sex, 1843–92. (Table 1.) . xxvi

Population, Numbers and Proportions of Marriages, Births, and Deaths. (Tables 39, 40.) . . . . . lxv, lxvi

UNITED STATES OF AMERICA; English Emigrants to. (Table 28.) . lv

URBAN MORTALITY. (Tables 24, 25, p. liii.) ix

from the Influenza Epidemics, 1890–91–92 ix

URINARY SYSTEM; excessive Mortality from Diseases of. (Tables 15, 16, pp. xli, xliii.) xvii

VACCINATION; Proportions of deaths from Small-pox certified as Vaccinated or Unvaccinated xi

imperfect information as to, in Certificates of Death from Small-pox xi

Deaths referred to effects of xi

VIOLENCE; Deaths referred to in 1892 xvii

(*See also* ACCIDENT, MURDER, MANSLAUGHTER, and SUICIDE.)

WHEAT; average annual Price of. (Tables A. and 38.) . . . . vi, lxiv

WHOOPING-COUGH, mortality from, in 1892, and 1882–91 xiv

local incidence somewhat analogous to that of Measles . . xiv

15 Counties having highest average mortality from 1882–89 . . xiv

Most fatal in large centres of population xiv

mortality from, in Counties, 1882–91 and 1892. (Table 23.) . . lii

Annual deaths and death-rates, 1868–92. (Tables 15, 16.) . . xl, xlii

PAGES

WORKHOUSES, Deaths in 71–94

WORSHIP, certified places of; additions and cancellations in 1892, and aggregate number on Register viii

ZYMOTIC DISEASES; further increase of Mortality from, in 1892. (Table B.) x

Deaths and Death-rates from the principal, in each year, 1868–92 (Tables 15, 16), and Death-rates in groups of years 1858–90 (Table 17) . . . . . xl–xliv

Death-rates from principal, in England and Wales (Table 18), in London (Table 19), in Counties (Table 20) . . . xlvi–xlix
